For a fine grind, use 2530 seconds. The lid can be washed in warm soapy water. On the KMM30, bean receptacles can be put in the dishwasher. You can also clean the opening with the cleaning brush or a pipe cleaner. The electrostatic charge of the beans is different from the electrostatic charge of the plastic. We suggest rinsing the lid or bean receptacle in cold water prior to use to cut down on the static charge on the plastic. Too coarse means underextraction and weak coffee not containing a full and balanced flavor. Further, if the ground is too fine, the filter can get clogged causing possible overflow. Best is a mediumsized ground. Some prepacked coffees, especially when packed in a vacuum deliver the same freshness, but as soon as you open the pack, the coffee loses the aroma when it gets in contact with light and air. Therefore, you should grind only the amount that you need for immediate use and store the beans airtight in a dark place. Similar models may be sold with different specifications or attachments in different markets. The transparent lid 2 can be washed by hand; do not clean it in the dishwasher. The grinding area in the motor part 1 should be cleaned with a small brush. Le couvercle transparent 2 peut etre nettoye a la main mais non au lavevaisselle. La tapa transparente 2 puede lavarse a mano; no lo ponga en el lavavajillas. El recipiente del cuerpo del aparato 1 debe limpiarse con un pequeno cepillo. 150 watt motor Graduated measuring scale Convenient cord storage Also great for finely chopping nuts Color BLACKThe details are what make this grinder exceptional The lid is transparent for monitoring the grind, and has two downpointing ribs to guide beans toward the blades for even grinding. The design of the stainlesssteel blades, combined with the 150watt motor, means beans can be ground quickly without overheating and spoiling the coffee's taste. For safety, the grinder will not work unless the lid is securely in place and locked down. Finally, the power cord wraps around the grinder's bottom for neat storage. Clad in elegant black, the grinder carries a oneyear warranty against defects. Fred Brack Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. Customer 5.0 out of 5 stars For some salads, we use peanut and dried shrimp powder. We have this machine for more than 4 years grinding powder of dried shrimps, peanuts, other nuts, roasted cumin, red pepper, black pepper, etc., everything other than coffee though its quite small. Im not a coffee lover so I dont grind coffee with this machine. I use instant coffee if I want to drink coffee. After grinding, I just washed it with soap and water carefully not to get wet outside of this grinder and wipe dry. No smell of earlier items left such as from cumin, I can grind coffee if I want, without mixing smells. It takes only a few seconds to grind dried shrimps. I also tried Cuisinart DLC2ABC Mini Prep Plus for grinding powder but it didnt even grind panuts and had to return it. If you want to grind powder for Asian food, this is a life saver.

Ive always had good luck with Braun appliances, so chose this sleek and easy little grinder, which is simple to operate and clean; it only has one lever, with the fineness of the grind determined by how long you press it down, and the progress is visible through the clear top. Cleaning is a snap The top rinses out, and a swipe with a paper towel cleans out the grinding cup, which is part of the motorized section, and the bottom has a handy spool for use as a cord wrap. Now my little kitchen area is permeated with the smell of fresh coffee, my lattes taste better than ever, and I have the new adventure of trying out different types of beans, and delight in the wondrous world of gourmet

coffee !Why do manufacturers make the cord so short do they think we have plugs all over our homes. This is an update, bought in Nov 2017, and it already gave up the ghost. The first one lasted for years. So upset that now another one has to be bought.I use a French Press pot which requires corser ground coffee than other pots, so that means no preground coffee for this girl. With the Braun,I can individualize the grind and have a great cup of coffee. The grinder is easy to use, and clean. Its cord winding is all manual. You twist it up around the bottom. Other grinders have a cord that must be pushed back and pulled out. 9 ot of 10 Of them dont retract or come out to plug in the electrical socket. I keep my appliances stored in a cabinet, which means cord neatness is necessary. The color of the grinder is not a big deal. Black was cheeper so that is why I chose it over white, or silver.Makes my coffee taste delicious. I keep mine in the cabinet beside the coffee because I hate stuff on the counter. With the shorter cord and convenient area to wrap the cord, its so simple just to put it in the cabinet next to the filters. I have not one gripe about this nifty little grinder. I cant imagine how it could or should be better.It took just a few minutes to grind a pound of coffee.

We are very pleased. Thanks again Amazon CatherineThe unit grinds beans to a nice uniform size in short order. The only thing I dont like about this guy is that the hopper holds a rather small amount of beans. Not a big deal for us, but a limitation to consider I suppose. Given the price, this is an excellent value and I would not hesitate to purchase this unit again. The only reason I dont give it 5 stars is because of the hopper size.So far so good. The cleaning is really not too bad once you get used to it. Just wipe with a damp towel and dry up with another towel. It grinds better when you have a minimum of 3 tablespoons of beans.Page 1 of 1 Start over Page 1 of 1 In order to navigate out of this carousel please use your heading shortcut key to navigate to the next or previous heading. However, we believe that the manuals should include the most important and needed information about Braun 4041, not to discourage the user to read. Obviously, if a device Braun 4041 has multiple advanced functions, we will not avoid a high amount of information in this document. Then, it will be much easier to find it than look through the purchase boxes which have already been thrown away by you or any other of household members. It will be enough to clear the drawer once in a year and throw away any manuals of the devices you do not use anymore. Thus, you can avoid storing any unnecessary documents and keep only those which are valid. You can also download and print the manual Braun 4041 to place it in your drawer. Ask your question here. Also make sure that it has the Braun coffee grinder parts available and if there is some fault in the machine, you may find the replacement part. So make sure you check all these things and you do not end up having a coffee grinder from a cheap store which gets broken after sometime and have no guarantee from the store. Also make sure that the coffee maker you are buying is original Braun made and not a copy of Braun as it will not have a warranty and would be of cheaper material. READ Braun Grinder Review KSM2 or KMM30 The Best Burr Grinder Coffee Maker. Braun Coffee Grinder Replacement Parts. Advertisement You will not be required to buy the whole new machine again, simply get the broken tool from the Braun coffee grinder parts by entering the model number of the machine. You can find the replacement part of each of the above given models on this site. By simply clicking on the model number, you will be directed to the parts page where you will find each and every part along with the price however there are some parts which are not available. You can also get the replacement parts from the Braun store directly. Braun Burr Grinder Among the various Braun coffee grinders, the Braun burr coffee grinder is the most famous and the most purchased Braun product in the market today. In this grinder, you will find two very fine stainless steel blades that will grind your coffee to a much higher standard than other burr coffee grinders available in the market today. The upper blade rotates at a set speed while the other blades remain stable beneath the coffee beans and due to this reason a very high quality flavored coffee is produced from it. The blade in the burr grinder rotates at a slow speed but it is faster than the other conical burr grinders. The reason for having the lesser speed is that less heat is produced at the time of grinding due to which more flavor gets preserved in the coffee.

Besides when the blades rotate at a slower speed, the less beans will cling to the inside of the coffee grinder and this will make the cleaning process easier.
